

Jean-luc Doumont's

Networking for researchers

A success factor for any career, networking can be daunting for shy people, who then envy the "people-oriented" ones. In fact, both the introverted and the extraverted can benefit from a more systematic approach to professional networking. This lecture reviews the types of network worth considering and the approaches to effective networking, both face to face and online, each time offering concrete, readily applicable tips.

An engineer (Louvain) and PhD in applied physics (Stanford), Jean-luc is acclaimed worldwide for his no-nonsense approach, his highly applicable, often life-changing recommendations on a wide range of topics, and *Trees, maps, and theorems*, his book about "effective communication for rational minds."

Please join us for one of Dr Doumont's world-famous lectures for researchers.

Everyone is welcome to attend:
tell your friends, colleagues,
students, and everyone else
in Brisbane. See you there!

Thu 6 Dec 2018

from 10:00 to 12:00

Room N34_0.05
