

Jean-luc Doumont's

Making the most of your presentation

Strong presentation skills are a key to success for engineers, scientists, and others, yet many speakers are at a loss to tackle the task. Systematic as they otherwise can be in their work, they go at it intuitively or haphazardly, with much good will but seldom good results. In this talk, Dr Doumont proposes a systematic way to prepare and deliver an oral presentation: he covers structure, slides, and delivery, as well as stage fright.

An engineer (Louvain) and PhD in applied physics (Stanford), Jean-luc is acclaimed worldwide for his no-nonsense approach, his highly applicable, often life-changing recommendations on a wide range of topics, and *Trees, maps, and theorems*, his book about "effective communication for rational minds."

Join us for Dr Doumont's most successful lecture year after year in top-notch universities and research centers worldwide.

Everyone is welcome to attend:
tell your friends, colleagues,
students, and everyone else
in Woods Hole. See you there!

Thu 19 Oct 2017
from 2:30 to 4:30 pm
